

secMAC+ - VIDEO LARYNGOSCOPE

Optional secMAC+
Flight case for safe storage
and easy access

We proudly introduce the secMAC+ video laryngoscope that will revolutionize the field of video laryngoscopy.

The secMAC+ boasts large **horizontal and fully adjustable high resolution screen** that can be tilted forth in any given position until folded completely down. The screen can also be rotated both ways to cover all intubation and viewing angels.

The interchangeable and rechargeable batteries offers up to **4 hours of active battery time** and has a battery time indicator visible on-screen. The secMAC+ is built around a very sturdy metal frame, making it **extremely durable** and the intelligent blue light source ensures **very clear and realistic image** during the procedure with **no image delay**. The secMAC+ also provides the opportunity for **recording photos and video clips** for both documentation and educational purposes. The secMAC+ can of course also be used for direct laryngoscopy, should the need arise.

The secMAC+ provides easy, quick and safe intubation in both clinical and trauma situations with a **wide selection of sterile disposable blades** to cover every possible intubation scenario. It will easily fit in the pocket of both the clinician, the trauma doctor or ICU personnel. **Always ready - always at hand.**

Intelligent
blue lighting
for optimal
visibility

Liquid safe
for easy
cleaning

Adult
& Pediatric
scopes

The disposable blades :

- Sterile
- Atraumatic
- Anti-fog treated
- Very robust design
- Wide selection of blades and sizes
- Highly transparent for optimum visibility
- D-Blade for difficult and extreme airways

D-Blade
for difficult
airways

M-Blade
Macintosh
style

Liquid safe: Meets with standard **IPX7** for handle and **IPX4** for screen

Slimmer camera stick has enabled the design of **slimmer blades** - creating better manoeuvring capabilities of the scopes in the airway and a **better visibility** of the process

The scopes comes with **2 rechargeable batteries** and battery charger, to make sure secMAC+ is always ready with just one touch at **the one button**

Wide selection of sterile disposable blades

With the secMAC+ comes a wide selection of sterile disposable blades to cover everything from the routine intubation to management of the extreme airways. Disposable blades for intubating a large adult to the neonate infant.
